

## LYMNOZYME (Liquid)

Supplied by Point Four Systems Inc.

*A blend of naturally occurring Beneficial Microbes effective in improving water quality in culture conditions.  
Water Conditioner - Aquaculture Management Product*

\*Do Not Freeze. Keep Refrigerated

LymnoZyme™ is a patent pending probiotic. Not a medication or chemo-therapeutic product, but is naturally occurring probiotic which can improve water quality in aquaculture systems. LymnoZyme™ is safe for fish and aquatic organisms when used as directed for specific applications. Oxygen demand may be temporarily elevated during the initial use.

- Improves growth and feed conversion
- Improves survival rate of aquatic species
- Reduces stress and disease susceptibility
- Reduces the need for expensive drugs

### Application Procedure:

1. Apply one (1) quart (1 liter) LymnoZyme™ liquid per 100,000 gallons (378,000 Liters) of system volume once every three (3) days for three (3) treatments.
2. Apply one (1) quart (1 liter) LymnoZyme™ liquid per 100,000 gallons (378,000 Liters) of system volume once per week for two (2) weeks.

### Maintenance Procedure:

1. Apply ½ quart (1 pint, 500 millimeters) LymnoZyme™ per liquid per 100,000 gallons (378,000 Liters) of system volume once per week to maintain water quality conditions.

For metric conversion = 1 Surface Acre = 0.4047 hectares

1 Hectare = 2.471 acres

\*Individual dosing may vary due to biological or site specific conditions.

**CAUTION: Marginal ponds with low oxygen conditions should be monitored during application or aerated if oxygen depletion is expected.**

Please use common sense. Point Four Systems Inc. gives no safety liability warranty, expressed or implied and assumes no responsibility for improper application, misuse or mishandling. It is solely the responsibility of the user to take appropriate precautions.
